

The Actuarial Team plays a pivotal role at Faraday. The work is extremely varied and includes:

- Reserving
- Capital allocation
- Profitability analysis
- Commutations

These areas are fundamental to the financial success of Faraday and require a thorough understanding of all areas of the business.

The highly motivated and professional team builds on strong technical foundations to develop practical solutions to insurance business issues. We use our strong communication skills to present these solutions to our end users - management and underwriters.

The Actuarial department is:
